Objective: Seeking an AI/ML role where I can leverage my skills in data analysis, machine learning, and programming to develop intelligent, data-driven applications.

INTERNSHIPS AND PROFESSIONAL TRAININGS

AI/ML Virtual Internship – Google (AICTE) Jul 2024 - Sep 2024

- Completed a 10-week hands-on internship in Artificial Intelligence and Machine Learning supported by Google and AICTE.
- Learned the fundamentals of Machine Learning, data preprocessing, model training, and evaluation.
- Worked with Python, NumPy, Pandas, and Scikit-learn to build and analyze ML models.
- Also gained hands-on experience in supervised and unsupervised learning techniques.
- Built and deployed ML models using real-world datasets.

Professional And Placement Training (TNS INDIA FOUNDATION) Mumbai
Training in Machine Learning Jun 2025 – Sep 2025

- Completed a comprehensive placement-oriented training covering Python, Data Structures and Algorithms, Machine Learning, Deep Learning, Neural Networks, and Natural Language Processing.
- Attended tech sessions explaining advanced AI and ML concepts.
- Participated in soft skills sessions focused on communication, teamwork and interview readiness.

PROJECTS

Project 1 – ATTENDIFY – A FACE RECOGNITION-BASED ATTENDANCE SYSTEM

- Attendify is a face–recognition–based attendance system built using an ESP32-CAM module and Python. The system captures real-time images, processes them using ML-based facial recognition, and automatically records attendance with high accuracy. It reduces manual effort and offers a fast, reliable, and automated attendance solution.

Project 2 – HEARTGUARD PREDICTION MODEL

- Developed a heart attack prediction model using machine learning techniques to analyze key medical parameters and predict risk levels. The system uses algorithms like Logistic Regression/Random Forest to deliver accurate, data-driven predictions. This project helps in early risk detection and supports preventive healthcare decision-making.

Project 3 – ML-BASED CROP SUITABILITY SYSTEM

- Developed a crop prediction system that recommends the most suitable crop based on parameters like temperature, soil pH, rainfall, and weather conditions. The model uses machine learning algorithms to analyze environmental data and provide accurate crop suggestions. This helps farmers improve yield, optimize resources, and make data-driven cultivation decisions.

TECHNICAL SKILLS

Programming Languages: C, Python, SQL, HTML, CSS.
Tools: VS Code, Jupyter Notebook.
Packages & Operating Environment familiarity: Windows, Linux.
Databases: MySQL, MongoDB
Libraries: Pandas, NumPy, Scikit-learn, TensorFlow, Matplotlib, Seaborn.

EDUCATION

Watumull Institute of Engineering and Technology, Ulhasnagar (Pursuing) Mumbai
Bachelor of Engineering in Computer Engineering Nov 2022 - Jun 2026
Major coursework: CGPA: 8.33
Artificial Intelligence, Machine Learning, Data Structures, DBMS, Data Mining, IoT, NLP, Python Programming, Big Data Analysis, etc.

S.I.E.S. College of Arts, Science and Commerce, Sion Mumbai
Higher Secondary Certificate (HSC – Science) Jun 2020 – May 2022
Major subjects: Score: 65.50 %
Physics, Chemistry, Mathematics, Computer Science

N.E.S. High School, Bhandup Mumbai
Secondary School Certificate (SSC) March-2020
Major subjects: Score: 91.80 %
Mathematics, General Science, English, Social Studies

ADDITIONAL INFORMATION

Extra curriculars

- Cultural Secretary in college (2024 – 2025)
- Black Belt in Karate
- Secured 1st place in the Intra-college Carrom Competition.
- Secured 3rd place in the Inter-college Sketching Competition.
